

REMARKS

This Amendment is being filed in response to the Office Action mailed September 5, 2007, which has been reviewed and carefully considered. Reconsideration and allowance of the present application in view of the amendments made above and the remarks to follow are respectfully requested.

Claims 1-12 remain in this application, where claims 13-20 have been added.

By means of the present amendment, the current Abstract has been deleted and substituted with the enclosed New Abstract which better conforms to U.S. practice.

In the Office Action, the Examiner objected to claims 1-12 for certain informalities. In response, claims 1-12 have been amended to remove the noted informalities as well as other informalities. Accordingly, withdrawal of the objection to claims 1-12 is respectfully requested. Claims 1-12 were not amended in order to address issues of patentability and Applicants respectfully reserve all rights under the Doctrine of Equivalents.

In the Office Action, claims 1-12 are rejected under 35 U.S.C.

§103(a) as allegedly unpatentable over U.S. Patent No. 6,658,325 (Zweig). It is respectfully submitted that claims 1-20 are patentable over Zweig for at least the following reasons.

Zweig is directed to computerizes robot with an on board internet web server. Instead of having a large number of internal sensors, the Zweig robot moves to close proximity of external sensors for communication therewith.

It is respectfully submitted that Zweig does not disclose or suggest the present invention as recited in independent claim 1, and similarly recited in independent claim 9 which, amongst other patentable features, recites (illustrative emphasis provided):

wherein said high level program instructions include synchronized multimedia integration language.

Further, there is no disclosure or suggestion in Zweig of the following feature of present invention as recited in independent claim 1, and similarly recited in independent claim 9 which, amongst other patentable features, recites (illustrative emphasis provided):

said multi-dimensional robotic web browser is directed to move in three dimensions, play back an audio stream, and play back a video stream.

These features are nowhere taught or suggest in Zweig. Accordingly, it is respectfully submitted that independent claims 1 and 9 should be allowable. In additions, claims 2-8 and 10-20 should be allowable at least based on their dependence from independent claims 1 and 9.

In addition, Applicants deny any statement, position or averment of the Examiner that is not specifically addressed by the foregoing argument and response. Any rejections and/or points of argument not addressed would appear to be moot in view of the presented remarks. However, the Applicants reserve the right to submit further arguments in support of the above stated position, should that become necessary. No arguments are waived and none of the Examiner's statements are conceded.

In view of the above, it is respectfully submitted that the present application is in condition for allowance, and a Notice of Allowance is earnestly solicited.

Respectfully submitted,

By 
Dicran Halajian, Reg. 39,703
Attorney for Applicant(s)
